

HIGH PRESSURE PISTOL HDP 1, PN40

High pressure pistol HDP 1, PN40 DATA SHEET

A Unit of IDEX Corporation

Infinitely adjustable from variable spray to full jet, by twisting the hand grip. An interposition creates a flat stream. Spray jet parabolic and appr. 0,75 m wide at a distance of 1 m. The high pressure pistol produces extremely small droplets. An internal hydraulic damping device prevents unpleasant pressure shocks. Inlet also swivelling under pressure.

High pressure pistol HDP 1, PN40

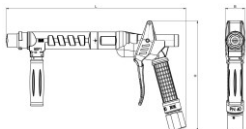

Feature:

- Universally applicable
- The finely atomized spray jet of the high-pressure gun HDP1 increases the extinguishing effect and simultaneously reduces water damage.
- Maximum working pressure: 40 bar
- Flow settings: 150 l/min or 200 l/min at 40 bar

Material:

Body: powder-coated aluminum alloy
